## INSTRUCTIONS

1. Use a ruler, Pistol Grip Glass Cutter, and Running Pliers to create a rectangle from the Violet Transparent sheet glass. Score the cut line with a Pistol Grip Glass Cutter, then break along the score line with Running Pliers.
2. Position the Flower Frenzy stencil onto the glass. Use an ultra-fine black Sharpie marker to trace the desired flower designs. Remove stencil.
3. Use a pallet knife to load 3 separate paint pots with small amounts of Deep Cranberry, Sapphire Blue, and Light Cerulean.
4. Mix in a small amount of Glass Medium into each paint pot until you achieve a heavy cream consistency. Start with a few drops of Glass Medium and add a little bit at a time as needed.
5. Use the combination of glass paint colors to fill in the traced design areas. Allow project to dry completely.
6. Overlay project with a layer of fine Clear Transparent Frit.
7. Contour fuse using the 6-segment firing schedule.
8. Once fired, slump project as desired.
