

Serene Reflection

Design courtesy of Slumpy's

Get creative with glass pre-cuts! This beautiful project combines glass painting and fusing to achieve a stunning piece of art.

MATERIALS

10" Clear Circle Transparent
BA5051 BubbleArt Cerulean Blue
BT-540 Thinfire Paper
Clear Transparent Frit - Coarse
GCU-96527 Koi
GM3002 Glass Medium

SUPPLIES

Paint Brush
Paint Pot
Palette Knife
Water

INSTRUCTIONS

1. Use a palette knife to fill a small paint pot with approximately a tablespoon of BubbleArt Cerulean Blue.
2. Mix in a small amount of Glass Medium into the paint pot until you achieve a thin cream consistency. Begin by adding a small amount of Glass Medium, then add additional drops if needed.
3. Use a drop and fill technique to paint the 10" Circle Clear Transparent glass base with Cerulean Blue. Use the paintbrush to drop the paint onto the glass surface, then fill the desired area.
4. Assemble and position the Koi glass pre-cut onto the glass base.
5. Cap the remaining painted area of the glass base, around the Koi pre-cut shape, with a leveled layer of clear coarse transparent frit. Allow project to dry completely.
6. Full fuse using the 6-segment firing schedule.
7. Once fired, slump glass piece in the Large Radial Plate Mold.
