

# Wavy Wonder

Design courtesy of Slumpy's

Get creative with Slumpy's molds to create this cool serving dish!

## MATERIALS

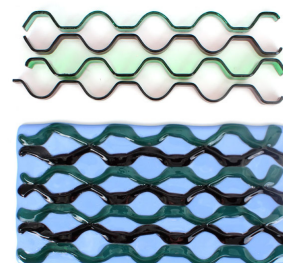

1GBS-12-W05 Superior Blue Opal Sheet Glass - 12 In Sq. - Single  
Assorted Glass Strips  
PT-540 PAPHYROS Kiln Shelf Paper  
SM-2575 Medium Valencia Server Mold  
SP-415 Glass Separator  
SP-8268 GlasTac Gel  
SS-702 12" Square Weave Mold  
ST-205 Boron Nitride Spray II  
ST-340 Tarheel Tools Running Pliers  
ST-352 Tarheel Pistol Grip Glass Cutter

## SUPPLIES

Ruler  
Toothpick  
Water

## INSTRUCTIONS

1. Prime the 12" Square Weave Mold with Boron Nitride Spray II according to the product instructions. Allow primed mold to dry prior to use.
2. Position 7 glass strips, in your desired colors, over the primed 12" Square Weave Mold.
3. Drape the glass strips over the mold using the 6-segment firing schedule.
4. Once fired, remove the glass strips from the mold and set aside.
5. Using a ruler, a Tarheel Pistol Grip Glass Cutter, and Tarheel Tools Running Pliers, score and break the 12" Superior Blue Opal Sheet Glass in half to create two 12"x6" pieces.
6. Stack the two 12"x6" glass pieces to create a double-layered project base.
7. Arrange the draped weave glass strips upright onto the project base, as shown below. Secure with pinpoint of GlasTac Gel.

8. Position project in your kiln on top of PAPHYROS Kiln Shelf Paper. Full fuse using the 6-segment firing schedule.
9. Once fired, slump in the Medium Valencia Server Mold, primed with Glass Separator, using the 6-segment slumping firing schedule.
