

Wavy Christmas Scene

Design courtesy of Slumpy's

This fun geometric design will get you in the holiday spirit!

MATERIALS

GSLAB-100-ICE 6x12" clear ICE transparent slab
GBLOCK-W50 Turquoise Green Transparent Block
GSLAB200 6x12" White Opalescent Glass Slab
S355-96 Marigold Opalescent Stringers
Olive Green Transparent Glass Stringers
RTO355-96 Marigold Opal Glass Rods
CFI200M White Iridescent Frit
SP-8234 GlasTac
ST352 Pistol Grip Glass Cutter
ST340 1" Running Pliers
SS-780 Medium Wave Mold

SUPPLIES

Ruler
Tweezers

INSTRUCTIONS

1. Cut a 1" strip from the White Opaque sheet and position at the bottom of the clear 6x12" base.

2. Using three of the Turquoise Transparent Green pieces, cut a triangle using the 2.5" base and the tip to about 4.75"

TIP: Use a ruler, scoring tool, and running pliers.

3. Using the scoring tool and running pliers again, cut triangular, geometric shapes out of the three big triangles, while maintaining the pieces together, so they make a broken up tree.

4. Position the three trees evenly along the white strip which becomes the snowy ground.

5. Add color stringers to desired sections of the trees.

6. Cut Marigold Opal Glass Rod to make small circular pebbles and add to desired areas on trees.

7. Sprinkle White Iridescent Frit onto entire scene to create snow.

8. Fire to a Tac Fuse Schedule flat.

9. Place onto primed SS-780 Medium Wave mold and fire at slump schedule.
